Q SPECIALS

Issue 21, January to March 2010

PLUS THE LATEST NEWS ON ELECTRICAL CONNECTION PRODUCTS

NEW STRIPAX - AUTOMATIC STRIPPER

Crazy!!
\$65
+ \$6.50 GST

- Self-adjusting blades - wont damage the wire
- Cutting capacity up to 6mm²
- Extension of cross section
- Fold-out cutting guard
- Stripping length up to 25mm
- Easier exchange of stripping blades

ORDER DETAILS	SALE PRICE	PART NO.
Stripax	\$65 + \$6.50 GST	9005000000

COMBI CHECK 1.3 VOLTAGE TESTER

Hot Price
\$59
+ \$5.90 GST

Order Number:
9918860000

- Voltage Indication - 6V, 12V, 24V, 50V,120V, 230V, 400, 690, AC/DC
- Polarity indication & Phase testing
- One hand operation possible
- Protected test probes
- Illuminated measuring probes
- Acoustic signal for voltage continuity

AM16 Stripping Tool

Low Price
\$65
+ \$6.50 GST

PZ 6 Roto Ratchet Crimp Tool

Sale
\$149
+ \$14.90 GST

Crimper 6I Crimping Tool For Insulated Connectors

Sale Price
\$59 + \$5.90 GST

ECO30 Low Cost Relay

Low
\$8.90 + \$0.89 GST

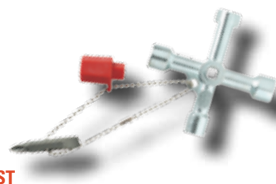

Clamp Meter For AC/DC Currents

Special
\$199 + \$19.90 GST

Universal Switchgear Cabinet Key

Only
\$20
+ \$2.00 GST

6 Piece Screwdriver sets
In both Standard and Insulated

From as Low as \$35 + \$3.50 GST

Weidmüller

KT 8 CABLE CUTTER

Very Hot

\$35

+ \$3.50 GST

Order Number:
9002650000

- Precisely cuts copper and aluminium cables
- Cutters open automatically and includes safety latch
- Cuts up to 8mm in diameter

THE AM 16 STRIPPING TOOL FOR PRECISE RESULTS

Low Price

\$65

+ \$6.50 GST

Circular Cut

Longitudinal Cut

Order Number:
9204190000

- Ingenious solution: the set screw allows you to adjust both the cutting depth and the type of stripping from a circular to a longitudinal cut in no time at all.
- Precise cutting: the top quality pivoting blade on the underside of the tool delivers absolute stripping precision. Insulation can be stripped from any desired point on the cable

T Series Power Supply

New High Performance Industrial Power Supply

The T-SERIES is a new generation of high performance DIN-rail mounted single-phase power supplies designed to work reliably even under the most demanding industrial conditions. A high power reserve guarantees reliable start-up of loads with high inrush currents such as motor starting applications. Excellent electrical specifications and high immunity against fluctuations in input voltage makes these compact modules the best choice to power sensitive loads in industrial process control systems, machine tools or other demanding industrial applications.

Models are available ranging from 12VDC through 48VDC output voltage, and up to 25A output currents. These voltage ranges enable the T-SERIES supplies to be used in virtually any single-phase application.

All of the new power supplies include innovative features such as integrated overvoltage temperature protection, available diagnostic output, external shutdown ability, a power OK signal, and remote convenient ON/OFF functions which makes them easy to maintain or troubleshoot.

Designed for use in harsh industrial environments, the T-SERIES are true industrial power supplies and feature a rugged metal housing and vibration and shock-proof construction, and an operating temperature range of -25°C to +70°C.

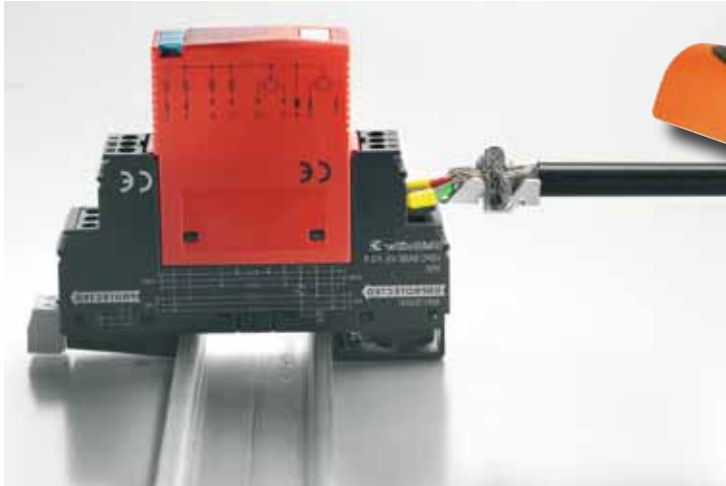

With an MTBF of up to 1.8 million hours T SERIES power supplies are the reliable solution for the most critical of applications.

Features

- Ultra Reliable MTBF up to 1.8 million hours
- Designed for harsh industrial environments -25 to +70 Deg C
- Indefinite short circuit, overload and over temperature protection
- Shock and vibration proof
- Designed for redundancy applications

Pluggable Surge Protector

For Control and Instrumentation Circuits

Electrical discharges caused by lightning, mains switching transients and other electrical surges can be the cause of disruption or corruption of signals or even the total destruction of sensitive control and instrumentation equipment.

The new "Varitector SPC" range of plug in surge arrestors offers unprecedented flexibility and functionality and protection. Up to four digital or two analogue circuits may be protected with a single 17.8mm module. This represents only 4.45mm per digital or 8.9mm per analogue circuit. Internal function and alarm displays, as well as external alarm contacts provide visual and remote indication of protection status.

Unlike older style pluggable surge arrestors removal of the "Varitector SPC" plug in cartridge does not interrupt the signal so testing of live ELV digital and analogue circuits is possible.

Control & Instrumentation Surge Protection

In the space of a DIN Rail Terminal

Lack of space is always an issue in control and instrumentation cabinets. Often surge protection is left until last or even worse, left out entirely. The requirement to retrofit surge protection into an already full cabinet is now as easy as removing a terminal and replacing it with Weidmuller's "Varitector SSC". The "Varitector SSC" provides surge protection for control and instrumentation circuits in the space of a terminal.

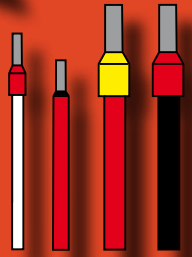

Weidmuller's Varitector SPC & SSC surge arrestors are also available in versions for industrial high frequency bus systems such as Profibus, Interbus, Devicenet, CAN & LON. For peace of mind & dependability in surge protection insist on Weidmuller

PZ 6 ROTO - RACHET CRIMP TOOL

Only
\$149
+\$14.90 GST

Order Number:
9014350000

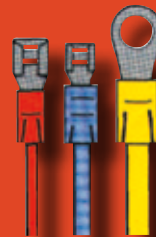

- For ferrules with or without plastic collars
- Rotatable crimp die for ferrule insertion from side or the front
- For cable sizes 0.14 to 6mm² in 1 crimp die
- Ratchet with automatic releaser

GRIMPER 6I CRIMPING TOOL FOR INSULATED CONNECTORS

Crazy!!
\$59
+\$5.90 GST

Order Number:
9040450000

- Ratchet crimping tool for insulated connectors 0.5-6mm²
- Easy connector insertion from the side with clear colour markings

ECO30 Low Cost Relay

Balance Between Reliability and Cost!

The balance between reliability and cost effectiveness is not always easy to judge. But with the ECO30 DIN rail mounted relay, you have a "fit for purpose" solution, for most of your switching needs.

With a high 8A switching capacity and 24VAC/DC input, the ECO30 is perfect for PLC and DCS I/O, SCADA and machinery applications.

More Features For Less Money!

- Internal back EMC suppression diode
- Long life silver N/O contact
- Slim 11.2mm wide
- LED indication

Clamp Meter

For AC/DC Currents

HOT!!
\$199+
\$19.90 GST

- Includes FREE carry case
- Measures voltages up to 1000V
- Continuity & diode testing
- Capacitance & frequency measurements
- Measures AC/DC currents - 400A/1000A ranges
- Resistance measurement & semiconductor test
- MIN/MAX memory, HOLD and PEAK functions
- Approved to Cat III/1000V to AS/NZS 61010-1

ORDER DETAILS	SALE PRICE	PART NO.
